FRONTEND DEVELOPER

I'm a Frontend Developer. With many years of studying and working in this field, I am confident that I can handle any assigned task. I have 3 years of experience in programming with strong knowledge of Web apps such as (ReactJS, NextJS, UmiJS, .NET Core, and some projects using VueJS).

With knowledge of UI/UX design, I have the ability to develop responsive web applications for Mobile Devices, Tablets, and Desktops in a flexible way. Create the best user experience for users. I also spend time learning new technologies and best practices to become a better engineer.

STRENGTHS AND EXPERTISE

- Programming Languages: Javascript, Typescript, C#, HTML5, CSS3.
 - Proficient in ReactJS using Typescript and its ecosystems, including Redux, Redux-saga, Router, Formik, Yup, and various UI libraries such as MUI (Material-UI) and Ant Design,... NextJS and UmiJS are the two main frameworks I leverage for building web apps and CMS. Additionally, for specific projects, I have also utilized VueJS. In terms of styling, I have hands-on experience with Bootstrap, Tailwind CSS, SCSS, and other styling technologies. I am adept at interacting with RESTful APIs, seamlessly making API calls from the Front-end to the Back-end. Furthermore, I have experience coding SEO-optimized websites using NextJS. This includes implementing best practices such as server-side rendering (SSR) and static site generation (SSG) to enhance search engine visibility and improve overall site performance.
 - With Mobile Development using React Native, I have built a successful Android application.
 - Have basic knowledge of NodeJS, and ExpressJS and work with Restful API using the NESTJS framework. Database: PostgreSQL, Microsoft SQL Server.
 - Knowledge of Docker, I have applied Docker for the company's microservices architecture. I using this for the deployment applications stage.
 - Others: Scrum for Project Management, familiar with Agile methodologies.
-

PROFESSIONAL EXPERIENCE

DigiTech Solutions CO., LTD

Education Managment Project

06/2022 - present

Front-end Developer

- **Description:** Edu management system for learners, businesses, and teachers with both online courses and offline training course, moodle-learning system.
- **Team size:** 6
- **Roles and Responsibilities in the projects:**
 - Maintenance of the older features
 - Optimize the performance of the website
 - Development of new features of Frontend and CMS: Permission management, Course, class, teacher, lesson management, ...
 - Planning, breaking down features into smaller parts, and estimating completion time based on requirements.
 - Refactoring source code: format, building common method and some vital modules,...
 - Review source code submitted by other members of team before merging into main branch.
 - Deployment for the production stage with Docker
- **Techstacks:** NextJS, Redux, Redux-Saga, Formik, Web Cookie, Local Storage, HTML/CSS, Material UI, AntDesign, Responsive, API, Docker, Google/Facebook OAuth, Github, Agile, Integrate with AlePay

Omnichannel Project

7/2023 - Present

Front-end Developer

- **Description:** Customer care and management channels across integration with multiple channels like fanpage Facebook, Zalo, and chatbot website.
- **Team size:** 5
- **Roles and Responsibilities in the projects:**
 - Integrate with fanpage Facebook, Zalo to get and send messages of customers, send zalo ZNS.
 - Integrate with ChatGPT, ChatGPT training with specific scenarios according to business requirements.
 - Setup Docker for the development environment, setup Dockerfile for staging, production building.
 - Planning, breaking down features and estimating for each task.
- **Techstacks:** NextJS, UmiJS, Redux, Redux Saga, Formik, Yup, Web Cookie, Local Storage, Html/CSS, Material UI, AntDesign, Responsive, API, Docker, Google/Facebook OAuth, Github, OpenProject, Agile, Alepay, Integrate with Zalo & Facebook, firebase

DMS Project

9/2021 - 5/2023

Front-end Developer

- **Description:** Supply chain management system from Distributors to Customer Shipto. Including more systems: Items, Routezone, Customer, Distributor, Purchase Orders, Sale orders, Inventory, ...
- **Team size:** More than 10

- **Roles and Responsibilities in the projects:**
 - Development for many modules of large projects, microservices, business logic, and component UI for front-end applications.
 - Communication with PO, BA to make clear and make Q/A about requirements.
 - Planning, breaking down features and estimating for each task.
- **Techstacks:** .NET Core, Blazor, Docker, Html/CSS, Responsive, API, Docker, Github, OpenProject, Agile

Other projects I have participated in during my work

B2B, B2C E-Commerce Project

02/2021 - 09/2021

Front-end Developer

- **Techstacks:** NextJS, UmiJS, Redux, Redux Saga, Redux-Form, Web Cookie, Local Storage, Html/CSS, Material UI, AntDesign, Responsive, API, Docker, Google/Facebook OAuth, Github, OpenProject, Agile, Integrate with AlePay

Referral Project

11/2020 - 02/2021

Front-end Developer

- **Techstacks:** NextJS, UmiJS, Redux, Redux Saga, Formik, Yup, Web Cookie, Local Storage, Html/CSS, Material UI, AntDesign, Responsive, API, Docker, Google/Facebook OAuth, Github, OpenProject, Agile

EDUCATION

Ho Chi Minh City University of Industry and Trade (HUIT)

Engineer's degree, Information Technology · (September 2017 - April 2021)

Diploma: Good type | Grade: 3.20/4.00

Digitech Training Program

- Ethic work & Working Culture
- Competency Develop by KASH model: Knowledge, Attitude, Skills, Habit
- Smart objective
- Softskills (Teamwork, Time Management, Task Management, Communication, Presentation, Problem Solving, ...)
- Technical skills: Agile/Scrum process, Github process, Coding rule, Software Architecture, Weekly Techtalk,...
